### Correction to Dunkley et al. (2014)

In the article “Advancing complex explanatory conceptualizations of daily negative and positive affect: Trigger and maintenance coping action patterns” by David M. Dunkley, Denise Ma, Ihno A. Lee, Kristopher J. Preacher, and David C. Zuroff (*Journal of Counseling Psychology*, 2014, Vol. 61, No. 1, pp. 93-109) there is an error in Table 4. Under the heading 95% CI for mean estimate, the confidence interval for the indirect effect  $g_{B^1B^2}$ : SelfCriticism  $\rightarrow$  PSocSupp  $\rightarrow$  PFCope  $\rightarrow$  PA is incorrectly reported as  $[-.072, .001]$ . The correct confidence interval is  $[-.072, -.001]$ .
